Work Experience

Client Project – NIVY App | _LINK_   Remote | 16 / Dec/ 2024 – 03 / April / 2025

Collaborated with the NIVY development team to build a match scheduling platform that enabled colleges to efficiently organize, manage, and update inter-institutional sports matches via a web application.

- Designed and developed the Matches Management page to display scheduled matches with full CRUD functionality.
- Implemented intuitive UI/UX for seamless match creation, editing, updating, and deletion operations.
- Ensured dynamic data handling and real-time updates to improve platform efficiency and user experience.

Front-End Developer – Hā Health Website | _LINK_   Remote | 26/ June/ 2025 – 03 / September / 2025

Collaborated with the Hā Health team to build an AI-powered wellness platform offering personalized meal plans, fitness tracking, and mindfulness tools designed to support healthier lifestyles.

- Developed responsive UI components with React, Next.js, and Tailwind CSS for seamless cross-device performance.
- Integrated AI-driven recommendation features for meals, exercises, and mindfulness into the front end.
- Worked closely with designers and backend engineers to ensure smooth user experience and functionality.

PROJECTS

Crypto Place – Real-Time Cryptocurrency Tracker | _LINK_   React.js | Tailwind CSS | CoinGecko API

Built an interactive cryptocurrency tracker delivering real-time price updates, advanced search, and historical trend visualizations.

- Integrated CoinGecko API to fetch live data and historical insights on global cryptocurrencies.
- Developed interactive charts for historical price trends and currency analysis.
- Developed a clean, responsive interface tailored for both web and mobile users.

Tomato – Food Delivery Website | _LINK_   React.js | Tailwind CSS | Redux Toolkit | REST APIs

Designed and developed a fully responsive food delivery platform with real-time restaurant listings, cart management, and seamless checkout.

- Integrated RESTful APIs to dynamically fetch restaurant and product data.
- Architected global state management with Redux Toolkit for efficient cart operations.
- Optimized user experience with a mobile-first responsive UI across all devices.

Corto – Product & Flight Search, Deals App | _LINK_   React Native | Redux Toolkit | REST APIs

Developed a multi-functional React Native application integrating product search, flight tracking, and real-time deals features.

- Implemented dynamic data fetching from multiple APIs to deliver real-time product, flight, and deal information.
- Utilized Redux Toolkit for efficient global state management, ensuring a seamless and scalable app experience.
- Designed intuitive navigation across three core pages: Product Search, Flight Tracker, and Deals Listings.
